

## FASA Grant Request – 2026 Women in Construction Week

Feb 25, 2026

Dear FASA Grant Committee,

On behalf of the American Subcontractors Association of San Antonio, I respectfully submit this request for grant support for our upcoming Women in Construction Week Mixer taking place on March 5, 2026, from 4:30–6:00 PM.

This event is designed exclusively for the women members of ASA and will provide a dedicated space for connection, mentorship, and professional relationship-building within our industry. We anticipate approximately 60 attendees, and the event reached capacity almost immediately after opening registration. The rapid sellout clearly demonstrates a strong desire within our membership for women-focused programming and networking opportunities. Based on this response, we are already exploring a larger venue for 2027 to accommodate anticipated growth.

The mixer will foster meaningful connections among women across various sectors of the construction industry, encouraging leadership development, peer support, and long-term engagement within ASA San Antonio. By creating intentional space for women professionals, we are strengthening retention, visibility, and advancement within our association and the broader construction community.

Grant funding from FASA will help offset event costs including venue expenses, refreshments, and program materials, ensuring that we can continue offering high-quality, impactful programming for our members.

We appreciate your consideration of this request and your continued support of initiatives that advance and elevate professionals within our industry. Please let me know if additional information is needed.

Sincerely,  
Jennifer Swinney  
Executive Director  
American Subcontractors Association – San Antonio
